

Ferno Static Rope

by Teufelberger

The Australian Standards certified Ferno Static Rope by Teufelberger is an exceptional static rope for rescue, life-safety and fixed rope applications, rappelling, hauling and caving.

The rope's sheath is balanced with a nylon core to limit rotation, bouncing and stretch. The combination of the unique cover and the optimal cover/core ratio produces a rope that feels incredibly smooth, has higher tensile strengths, high abrasion, excellent UV resistance, and superior handling and knot holding characteristics. **The Ferno Static Rope is certified to AS 4142.3-1993.**
