

## FERNO 309-7 BASKET STRETCHER

DHS-309-7

The Ferno 309-7 Basket Stretcher is a 'Stokes' type litter / basket with a high-density polyethylene patient shell supported and surrounded by a powder coated, aluminium frame. The basket stretcher is an economical addition to any industrial, mining or construction rescue cache.

### Features

- Monocoque design
- Full length runners beneath the patient shell provide additional support and assists when dragging over uneven terrain
- Fully exposed outer rail provides good handling and attachment options
- Suitable for vertical or horizontal lifting
- Supplied with three two-piece patient restraints with slot through buckles and Ferno Rapid Release tabs
- Made in Australia
