Features & Functions (continued)

Restraints (Continued)

Always secure a patient on the stretcher with chest and leg restraints.

To fit restraint to patient

1. Unbuckle each restraint and lay out ready for use (Fig. 6).
2. Transfer the patient to the stretcher.
3. Position the chest straps (Fig. 7) and buckle the waist strap through the slots in the buckles on the end of the chest straps (Fig 8).
4. Buckle the chest strap and tighten restraints to safely secure the patient without causing discomfort or impaired circulation.
5. Buckle the leg restraint across the patient's legs (Fig. 9).
