10	Winch Attachment
11	CD/ZA/MGS Cylinder Holder
12	Stow-Net

Designed for use in ambulances with a tail-lift or ramp, POWERX is ergonomically designed for enhanced handling and manoeuvrability, making it easier and safer to operate.

Powered to minimise potential manual handling injuries, the feature-rich POWERX has been further configured to satisfy the needs of paramedics, bariatric and specialist caregivers in Australia and New Zealand.

EASY TO USE & MANOEUVRE

- **Simple push button controls** are intuitive to use and learn
- **Four swivelling anti-static wheels** each with an individual brake and foot-activated directional wheel lock
- **Four push handles** at each corner of the stretcher. Two of these push handles incorporate extendable IV pole tips with hook and loop fastenings for fluid bags
- The POWERX **shortens to 1450mm** or 1540mm with the Stow-Net installed
- **Four bump wheels** on each stretcher corner prevents potential damage to building surfaces while protecting the stretcher from accidental damage

PATIENT COMFORT & SAFETY

- The **mattress** is constructed from layers of high density and memory foam and covered in a robust 2-way stretch material coated on both sides to repel fluids.
- Flat mattress surface facilitates **unhindered lateral transfers**
- The **winged headrest** can be adjusted to cradle the patient's head for enhanced comfort
- An **upgraded multi-point patient harness and leg restraint set** includes customised shoulder padding for extra patient security and comfort
- **New SX with Extender Wings** and cushioned pads increase surface area

EASY CLEANING & MAINTENANCE

- The stretcher's moulded top bed surface is light in weight but **durable and easy to clean** and maintain
- The mattress and headrest are both removable and offers **enhanced infection control** with bacteria resistant, wipe-clean surfaces.

POWER CONTROL

- Concens Controller and **28V (5Ah) Milwaukee battery**
- Battery delivers **±110 lift cycles from one charge based off a 200kg patient**, and ±66 lift cycles at maximum SWL of 350kg.
- **Short recharge time (<1hr)**, auto-sleep mode activates after 1 minute of inactivity
